

MATÍAS BATALLA

Data Analyst | Economics & Finance Specialist

Berazategui, Buenos Aires, Argentina | +54 11 6362-8912 | Matiasseb27@gmail.com | [LinkedIn](#) | [Project Portfolio](#)

PROFESSIONAL SUMMARY

Economics graduate (thesis in progress) with hands-on experience as a Junior Data Analyst in Argentina's national public administration. Google Data Analytics Professional Certificate holder, with strong day-to-day SQL and BigQuery skills and a solid foundation in macroeconomic and financial analysis. Experienced in building BI dashboards (Power BI, Looker Studio), automating reporting workflows in Excel, and turning fragmented datasets into decision-ready insights — both in public-sector and independent projects.

TECHNICAL SKILLS

Data Querying & Processing - SQL: joins, aggregations, filtering, and query optimization — daily production use in Google BigQuery - Academic exposure to CTEs, window functions, and views (coursework, not yet applied in production) - Python (pandas, seaborn) for data cleaning, exploratory analysis, and visualization - Excel: advanced formulas, pivot tables, VBA macros, dynamic financial models	BI & Visualization - Power BI: dashboard design, DAX calculated fields, dimensional modeling - Looker Studio: production dashboards for government KPI monitoring - Academic exposure to Tableau and R (tidyverse) — Google Data Analytics coursework
Financial & Economic Analysis - Asset valuation (equity / fixed income) - Linear and multiple regression modeling	Data Quality & ETL - Data validation, cleansing, and cross-auditing of large datasets - Basic ETL pipelines and null/inconsistency handling

PROFESSIONAL EXPERIENCE

Junior Data Analyst <i>Ministry of Industry and Productive Development — SME Sub-Secretariat</i>	<i>Aug 2023 – Feb 2024</i>
Data QA & ETL: Led validation, cleansing, standardization, and auditing of large-scale databases covering the national SME investment and financing portfolio, eliminating duplicate-record inconsistencies and improving data quality for ministerial decision-making. BI Design & Implementation (Looker Studio): Built automated interactive dashboards for senior leadership, enabling real-time monitoring of 20+ KPIs — approved disbursement amounts, geographic distribution, processing delays, and application queue flow. Reporting Automation: Designed dynamic templates and automated macros that significantly reduced manual daily data extraction and cut delivery time for recurring reports. Technical SQL Extraction: Ran daily complex queries against cloud data repositories (BigQuery) across multiple government data sources, maintaining consistent auditing of 1,000+ monthly transactions with a proven 90% accuracy rate.	

CERTIFICATIONS & SPECIALIZED TRAINING

Google Data Analytics Professional Certificate — Google / Coursera, 2026 Full analytics lifecycle: metric definition (Ask), data security & acquisition (Prepare), SQL and spreadsheet-based cleaning (Process), formulas and aggregation (Analyze), visualization with Tableau (Share), and an introduction to R for structured data manipulation (Act).
Data Analytics Professional Certification — CoderHouse, 2024 — Final project (queries & visualization): 10/10 Advanced Excel Data Processing — CoderHouse, 2023 — Grade: 9/10 (dynamic lookups, array formulas, VBA macros)

EDUCATION

- **Econometric Thesis in Finance (in progress):** Multivariate regression model for the valuation and analysis of publicly traded companies in Argentina's energy sector (YPF, Pampa Energía). Evaluates the impact of exchange-rate dynamics, country risk (EMBI), and macroeconomic variables on domestic asset prices.
- Intermediate degree earned: **Economic Analyst** (2024), after completing 36 courses on schedule within the formal program.

FEATURED PORTFOLIO PROJECTS

- **BellaBeat User Behavior Case Study (SQL, BigQuery, Python):** Consolidated and cleaned wearable-device usage data (FitBit dataset) via a BigQuery SQL pipeline; ran correlation analysis in Python (pandas, seaborn) linking sedentary behavior to sleep quality; delivered data-driven marketing recommendations for a wellness-tech company. Full write-up and code on GitHub.
- **Argentine Energy Market Dashboard (Power BI):** End-to-end dashboard unifying data from multiple public and historical capital-markets sources. Models hydrocarbon production KPIs, corporate balance sheets, and stock-price correlation against the Merval index for fast pattern recognition.
- **SQL Scripts for Macroeconomic Correlation Analysis:** Built optimized SQL scripts to map, impute missing values, and order time series for country risk (EMBI) and leading Argentine equities, using window functions to compute rolling historical correlations.
